CAREER OBJECTIVE

Motivated Full Stack developer with 1 year of hands-on experience in designing, developing, and deploying web applications using the MERN (MongoDB, Express, React, Node) stack. I am passionate about creating intuitive and efficient user experiences through clean and maintainable code. Seeking a challenging software development role where I can leverage my MERN expertise to contribute to innovative projects, collaborate with cross-functional teams, and continuously expand my skill set in a dynamic environment.

WORK EXPERIENCE

Medical Alert Device Delivery Specialist

MedScope

📅 2021 - current 📍 Massena, New York

- Efficiently coordinated and executed the delivery of medical alert devices to customers in a timely and professional manner.
- Conducted thorough inspections of each device to ensure functionality and reliability before delivery, ensuring the safety of the end-users.
- Managed all required paperwork, including delivery confirmation forms and customer agreements, with meticulous attention to detail to ensure accuracy and compliance with company protocols.

Military Police

U.S. Army

📅 2014 - 2019

- Enforced military regulations and civilian laws on military installations, maintaining order and security.
- Provided security for sensitive military installations, equipment, and personnel, including access control and response to security breaches.
- Trained and mentored fellow military police personnel on military regulations, legal procedures, and law enforcement techniques.

Project: E-commerce Website

- Description: Developed a full-fledged e-commerce website using the MERN stack, where users can browse products, and add them to their cart. Implemented user authentication using JWT. Utilized React, React-Redux, and Material UI for the front-end, Node, Mongoose, and Express for the back-end, and MongoDB for data storage.

Project: Project Management Website

- Description: Developed a comprehensive project management website using the MERN stack, designed to streamline project planning, collaboration, and task management for teams. Implemented a range of features to facilitate efficient project execution, including task assignment, and progress tracking.

Project: Tetris Clone

- Description: Developed an engaging and interactive Tetris game website using JavaScript, HTML, and CSS, providing users with a nostalgic gaming experience in their web browser. Implemented the classic Tetris game play mechanics, including falling tetrominoes, line clearing, and increasing difficulty levels.
